

Origami Valentine Heart

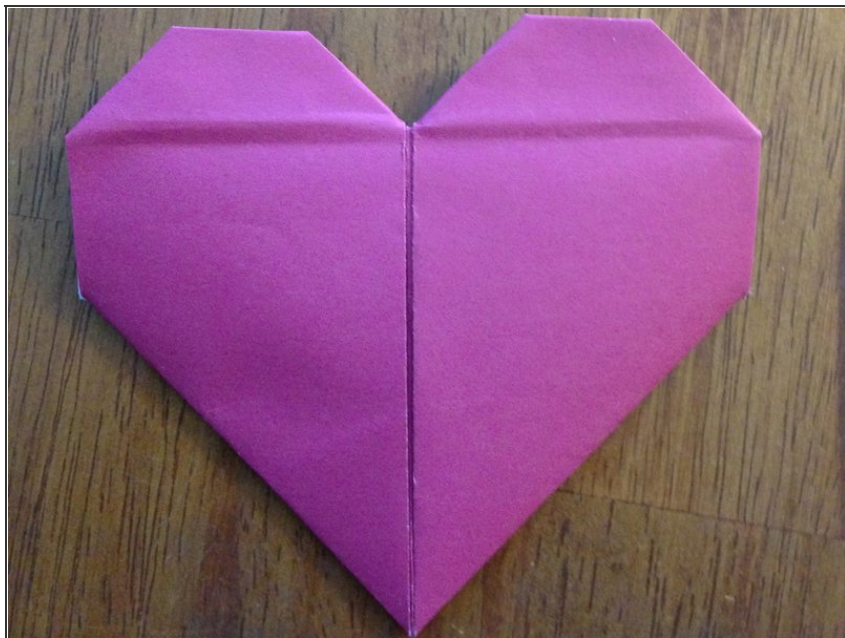

Written By: Julie Hudy

TOOLS:

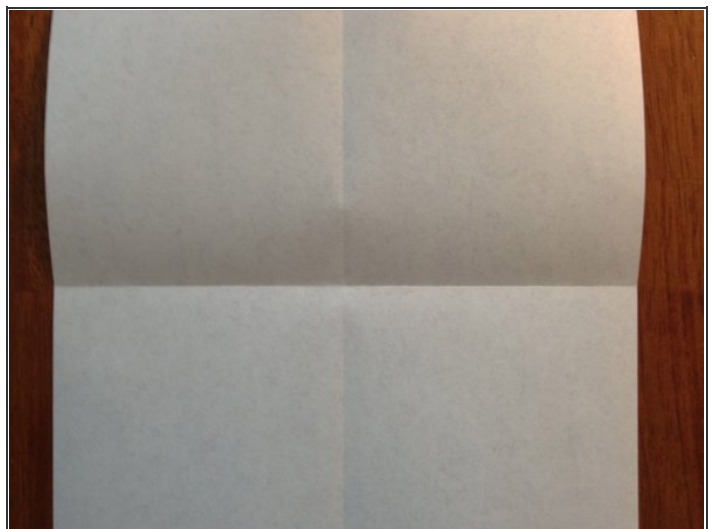

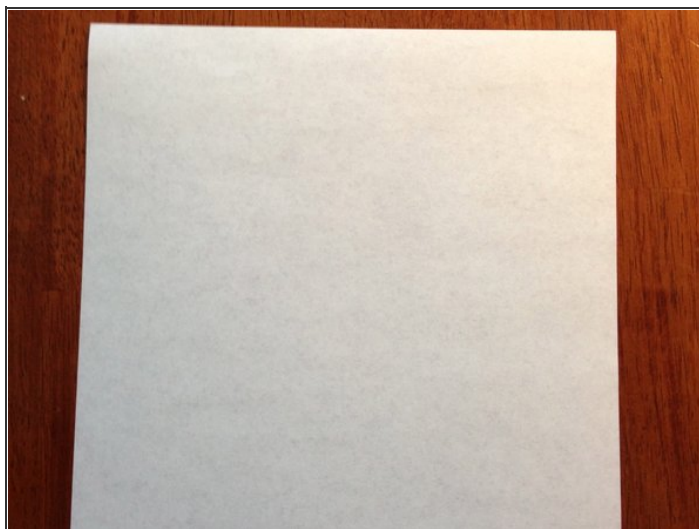

- [Origami Paper \(1\)](#)

Step 1 — Origami Valentine Heart

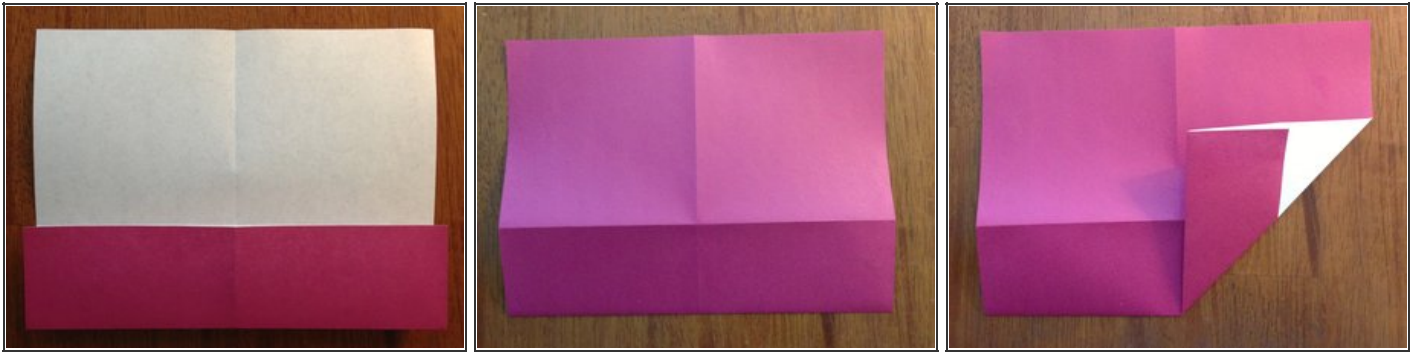

- Make an easy Origami Heart.

Step 2

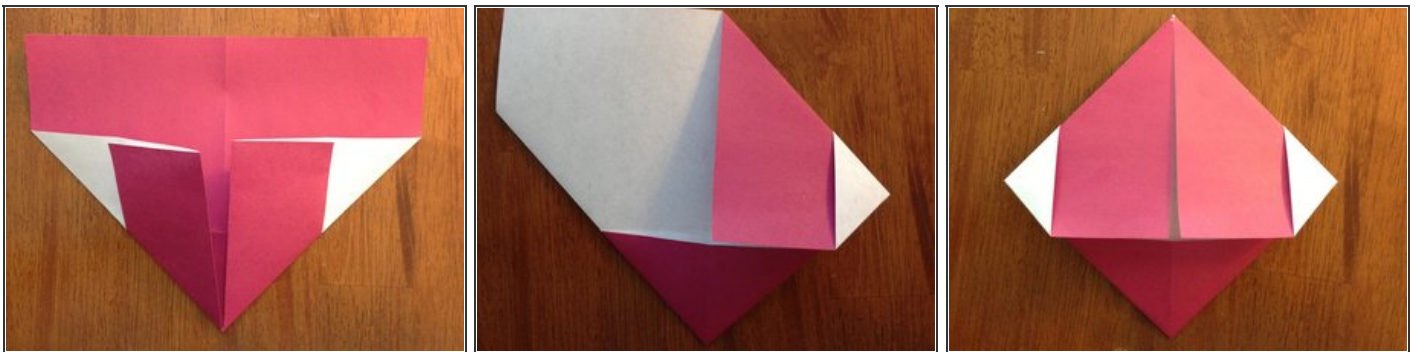

- Start with paper color side down.
- Fold a + in the paper.

Step 3

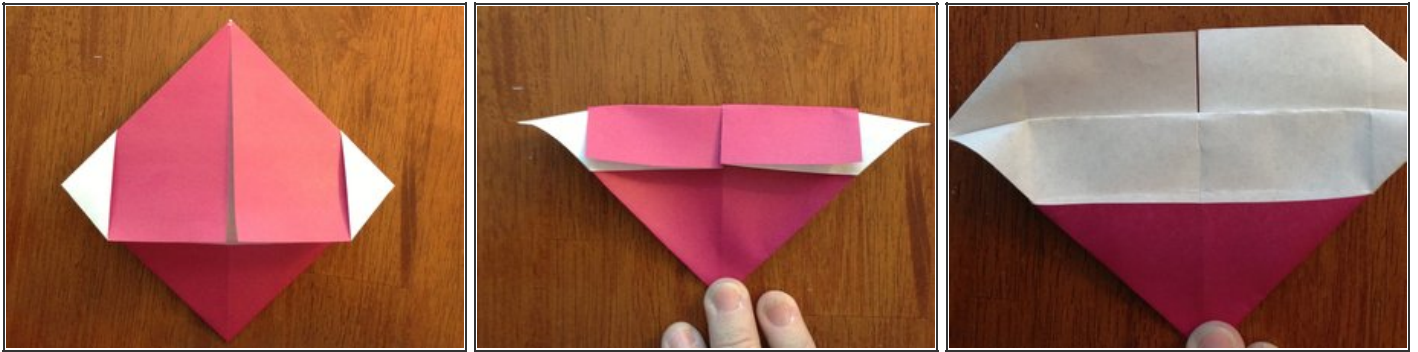

- Fold bottom edge to center crease. Crease well.
- Turn paper over.
- Fold as shown in picture 3.
- Do the same on other side. This is called an airplane fold.

Step 4

- The first picture shows the paper after your airplane fold.
- Turn the unit over.
- Fold another airplane fold as shown.

Step 5

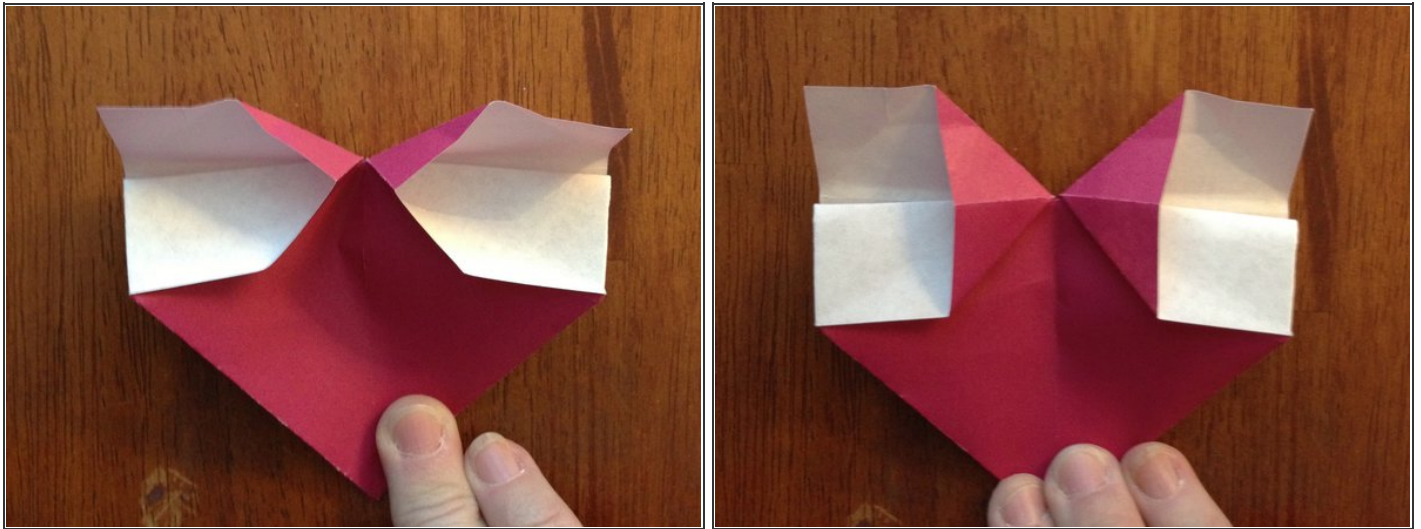

- Fold top point down to bottom. Crease only the center color section. Do not crease the white.
- Fold back the top section to reveal the white.

Step 6

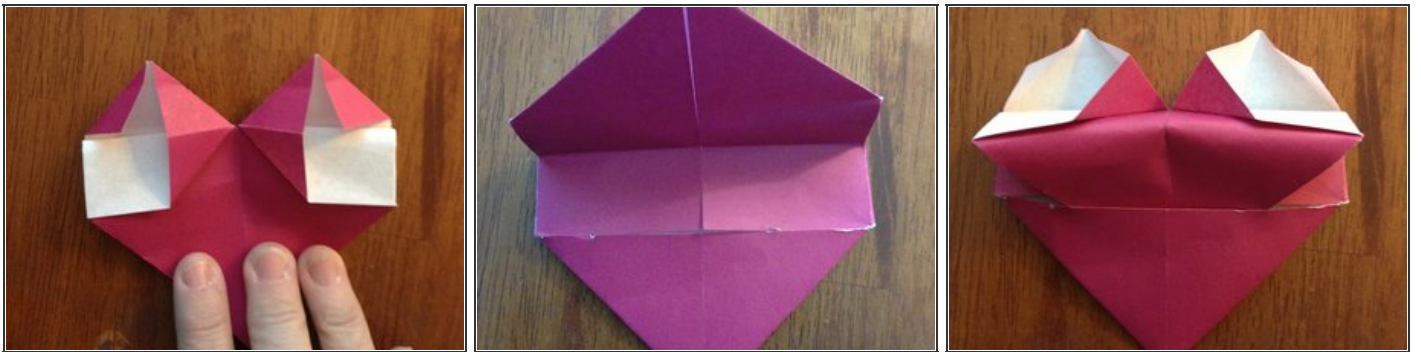

- Unfold. Fold the white tips inward along the crease.
- Unfold the white tips.
- Open one side just a bit, and reverse your fold. We are hiding the white tips inside.
- It should look like picture 3.

Step 7

- Fold top point down to bottom again.
- Press down the center to form triangles as in picture 2.

Step 8

- Fold each corner as shown.
- Open the top flap. There is a little pocket on the bottom.
- Being very careful, insert the top point into the bottom pocket. This will lock the heart in place.

Step 9

- This is what it looks like after being tucked in.
- Now just fold the top down a bit. This will make the curve of the heart.
- Turn it over and there you have it!
- Put a pin on the back and wear it for Valentine's Day.
